2. University Policies

Academic honesty: students are bound by the campus honor code.

In addition, unless explicitly stated, artificial intelligence-based technologies, such as ChatGPT, must not be used to generate responses for student assignments. The use of such programs for any course assignments, including your exams, reports, and essays, is not allowed in this course and could result in failing this class.

Late Work Policy: I only accept late work that is submitted within 24 hours after the deadline with a 10% grade deduction.
